

## SLAVONSKI BROD

## The Brod Fortress

Representing a baroque fortification, the fortress has framed the landscape of Slavonski Brod for over 200 years, with significant impact on how the city became an urban centre with a rich social and cultural setting. A publicly owned building, the size of the fortress offers many opportunities for its activation, but this also led the to space remain unused for a lengthy period of time.

"Slavonski Brod from above" (c) City of Slavonski Brod

While the revitalization process has mostly focused on specific parts of the fortress so far, the City of Slavonski Brod is interested in developing more projects that will incorporate different areas of the fortress. The pilot project has gathered different stakeholders together, alongside a vast array of knowledge that can be used as a basis for future projects. Due to its size and historical setting, the opportunities of developing the fortress into something both locals and tourists can enjoy, are vast.
